# Nuba Orphan school

You all may know that Sudan has been experienced civil wars for decades which affected every member of the family in the whole region due to this human hatred and attitudes towards each other. When Cain asked his brother Abel to go to a bloody field for his evil heart that forced him to plan dirty work against his blood brother. (Genesis 4:8). In fact, the innocent brother who had a good heart and kindness and love for his elder brother accepted the evil and dirty invitation to accompany Cain. Without knowing he is going to be a victim of him in the absence of the household. And today Sudan has had the same thing for these years of struggling to accept each other as brothers and sisters. But continue to see the bloodshed in every morning and evening without cease and brother against his brother and sister against a mother and so on. *For I have come to turn "a man against his father, a daughter against her mother, a daughter-in-law against her mother-in-law.* (Matthew 10:35). And who knows what would be the next, only God does. As result, many parents have been killed one or both in the civil wars and their children become without education and unable to attend schooling. And therefore, NOAH has jumped into their parent shoes to build orphan school that would offer them better education. Therefore, building orphan school is essential to those who understand the need for marginalised people including children at school age. (James 1:27).

Yes, we have started building the school and by the grace of God we will not stop the plan until it has achieved what we have planned for. (Isaiah 55:10-13). In my recent visit to Nuba Mountains, we started digging the foundation of the school even though it was busy time of their when people are so busy. The NOAH previous team were worked harder on their ability but too busy to manage the building project as it has been planned. However, the Lord has enabled us to be accomplished halfway building of classrooms in which we plan to open school on coming October by God's grace and willingness. Here is the report of what we have done so far in my currently visit to the Nuba Mountains.

Please take time to tour and entertain yourself around the school project and as you are going you will experience what God has done through us was unprotectable and incredible efforts in just 3 months of being there. (Nehemiah 6:15).

Once again enjoy your touring around orphanage school in Nuba Mountains in Sudan.

# Beginning of school foundation 2022

School foundation was the toughest work I have ever seen as many know me that I am not a builder but to experience the work from the start it is incredible. The builders who voluntarily put up their hands to help with the building to me it was unbelievable specially in Africa. Where people struggle to find job because of the work

unavailability, and I want to thank those gentlemen 1/ Andraws Musa 2/ Botros Hassan 3/ Daod Darniel these have done so much we are able to arrive in this level completion of six classes within 3 months only. Not only thank the builders but assistance as well 1/ Asir 2/ Amalia 3/ Nabil and others who contributed to the school building project.

Andraws is up there on building from outside behind the school and Andraws is belong to Moro tribe resides in Charphoa area.

You can see the end of the building and this side of line is pointing to South of school direction and will take 9 classrooms together. And the other side you can they put conjunction bricks to join other left side of school building

that takes 6 classrooms to be built. And on the other side of right hand of East of school will also take 6 classrooms to be built and we have already established the foundation and is ready to go for building. On at the north direction of the school there is school hall 45 by 25 meters long they have said that it will occupy 1500 to 2000 students.

Further, on the north direction of the school it would be as well swimming pool near to the sports-field behind school hall. They have indicated the sports-field would have more than for example, soccer, basketball, netball, volleyball, and athletic and so on.

So far, the builder had finished 5 classrooms which you can see it and they are now working to finalise the roofing and to conclude other minor job. It is great achievement I can say and am so proud of those men and women who helped with water and other assistance they have contributed. NOAH office of Nuba Mountains suggested that the school could open on coming October of this year 2022. However, I am so yet whether that could happen or not due to other resources and availability of budget.

## Girls toilets

## Boys toilets

## Women teamwork

This pool is made of bricks and cement as water tank to be use for building and these women voluntarily help to drawing water to fill it in afternoon ready for tomorrow work. I am proud of these Nuba women who have contributed massively into this job.

Yasir Abdalla is working with NOAH on the maintains the property and he is very hard-working man.

## School small farm

This field is for sorghum crops and these seeds are very productive and grow in the Nuba Mountains' soil. Not only that but the local people like it most and it is very popular for food in the region and whole Sudan.

School is to help provide hospitality assistance to the students as most of the parents in Nuba Mountains do not provide lunch for their children during school hours. And therefore, we plan to make that food available to our students during those hours in school. This farm though is to support school project with extra help for two meals a day lunch and dinner for those who would be in boarding school and day students.

This is NOAH tractor with Adnan the driver who is from Kadugli and his tribe call Meri people and he is a Muslim man and, he said that he is a mechanic too. They brought him from Omdurman in Khartoum to work for us. The tractor can do most of the agricultural work in all fields, sorghum, peanuts, sesames. However, it does require other part such as spares to enable it to run and get the job done.

The tractor was helpful with building provides stones and sands for school building and thank all the team who work together in bringing these materials. And, sometimes filling the tank when it is empty not only that, but it helps with transportation of people.

## **Prayer needed**

We have many things we want to put into your attention while you pray for our activities in Nuba Mountains in couple of months to come.

1/ Pray for the arrival of needing building materials for boys and girls dormitories including teachers compound such as zinc, iron, cement, and these materials are needed in the next two or three months from now.

2/ Pray for the builders who volunteer their time to help the work get done and pray also that the issue of hospitality will be resolve as it difficult right now to get enough sorghum for their food while working on school site.

3/ Pray for the arrival of school furniture from Port-Sudan to Nuba Mountains safely without any damage or security problem.

4/ Pray that the school will be ready to open on coming October 2022 and that uniforms and other teachers incentives would be meet at this appointing time.

5/ Pray for more volunteers to put their hand up in helping the work to be done in the school site in Nuba Mountains.

6/ Pray that it would be a lot of rain for this year early in May and people do farms in the Nuba Mountains better than last year.

7/ Prayer for our mission partnership and friends to be more involve than before in different fields of work in Nuba Mountains.

Overall, I would like to take this opportunity thank you all for your prayer and intercession that made the mission possible in 2022 and we thank you in the bottom of our hearts. If anyone wants to join our team or support the mission on the above-mentioned prayer requests do not hesitate to contact us.

For partnership with us please contact us on the following information and we will reply to you on suitable time.
